Profile

As a software engineer, I have extensive experience with Java, C#, C, Python, .NET, WPF, Unity, and Django, and have applied these tools to a variety of academic and personal projects. Through my coursework and extracurricular activities, I have gained expertise in areas such as software engineering, algorithm analysis, data structures, design patterns, machine learning, artificial intelligence, and natural language processing. I am committed to using my skills and experience to contribute to the success of any team I am a part of and am always eager to take on new challenges and learn from others.

Professional Experience

Back-End Developer, *Bumper UK*
Sep 2022 – Dec 2022 | Ankara, Turkiye
As a Back-End Developer Intern at Bumper, I focused on developing applications for the company's official website's admin panel. My work primarily involved utilizing Python and Django.

Front-End Developer, *Innova IT Solutions*
Jan 2022 – Apr 2022 | Ankara, Turkiye
Served as a Front-End Developer Intern for the implementation of the LEGA web application, primarily responsible for coding in TypeScript using the Angular framework.

Full-Stack Developer,
SimBT Simulation Science and Technologies Ltd.
May 2021 – Sep 2021 | Ankara, Turkiye
As a Full-Stack Developer Intern at SimBT, I played a key role in Turkey's first domestic virtual bridge simulator project, primarily developing WPF applications in the .NET environment and addressing hotfixes, bugs, and performance analysis tasks.

Education

Computer Engineering Bachelor's Degree,
TOBB University of Economics and Technology
Sep 2018 – Sep 2023 | Ankara, Turkiye

High School Diploma, *Karasu Anatolian High School*
Aug 2018 | Sakarya, Turkiye
GPA: 3.93

Projects

MetaFuar: Virtual Fairground for Interactive Product Showcasing
Developed MetaFuar, a virtual fairground in a team of five using Unity, Oculus Interaction SDK, and Photon. Created UI components like Login and Main Menu using C# and Unity, implementing Singleton and Composite patterns. Enhanced General, Graphics, Sound, and Language settings.

Skills

Programming Languages:
Java, C#, C, Python

Development Frameworks and Technologies:
.NET, Unity, WPF, Django

Development Environments:
Visual Studio, VS Code, Intellij Idea

Database Technologies:
SQL, MSSQL, SQLite

Project Management and Collaboration Tools:
Jira, Git, SVN, Github, Bitbucket, SourceTree

FreeRun: The Ultimate 3D Parkour Game
Created "FreeRun," a 3D parkour game in a team of three using Unity. Players navigate obstacles, use weapons to hit targets for bonus time and aim for the fastest completion time.

Music Genre Classification with Turkish Lyrics
Conducted a project in a team of two, utilizing Natural Language Processing techniques to classify Turkish song genres based on lyrics. Trained machine learning models and Bi-LSTM on a created lyric corpus. Results have the potential to benefit the Turkish music industry by understanding market trends, and consumer preferences, and aiding music discovery for Turkish listeners.
